Department of Computer Engineering/Information Technology

PROJECT APPROVAL FORM AND ABSTRACT
Even Term- 2025-26

B.Tech Project Details
Semester: VI

Group ID: IT-9

Title:	Smart Complaint Management System		
Project Type:	□ Community Based Design □ Problem (Interdisciplinary) □ Web APP/ Mobile APP □ IOT/Hardware based □ AI/ML/Data Science □ Healthcare/Agriculture Projects	Project Outcome:	□ Project and Research Paper □ Project and Patent □ Project and Book Chapter
Publication:	□ SCOPUS Conference □ SCOPUS Book Chapter □ SCOPUS Journal □ SCI Journal □ UGC Journal □ SPU Journal	Guide Name: Mr. Shailesh D. Patel	

Students Details:

Sr. No	Name	Roll No	PRN No	Branch& Semester	Mo. No	Signature
1	Suthar Hepin Vasantbhai	107	2021095900012335	6th IT	9875092395	
2	Valand Yash Rajeshbhai	109	2021095900012463	6th IT	7383720018	
3	Prajapati Dhruvik Vijaybhai	112	2021095900012617	6th IT	9327926178	
4	Patel Utsav Virendrabhai	111	2021095900012494	6th IT	9023443024

2. yashvaland18@gmail.com	4. up0398768@gmail.com

Signature of Guide:

Guideline:

1. A maximum of 4 students' group is permitted for project work.
2. As per the teaching scheme of the project , continuous assessment weightage is 25 Marks and university assessment weightage 25 marks.
3. Continuous assessment of the project is divided into Two Reviews of 20 Marks, 5 Marks of Regular Attendance, 25 marks by Guide as per the evaluation by project guide.
4. The student group must prepare the **Project Approval Form and Abstract** of your project and submit a guide title approved.
5. Submit the progress report of their project work as per guide instruction.
6. Internal Evaluation of project work will be based on **Presentation skill, functional understanding, design and implementation of work.**
7. At the end of the semester, student must submit their project report and Present a PPT and the implementation for evaluation.

Review Instruction(s):

1. Two reviews will be conducted in the semester for the project work evaluation. The Review-I weightage is 10 Marks and Review-II weightage is 10 Marks.
2. Students must prepare the presentation to present the project work during the review committee.
3. Presentation should include the following components: **Definition, Objectives, Functionality, Design Diagram, Tools & Technology, Timeline chart, References)**
4. A Review Panel of faculty members will evaluate the project work progress.
5. Students group must bring progress report card signed by supervisor during the review-II

ABSTRACT

The Smart Complaint Management System is a secure and efficient web platform designed to streamline student grievance handling in educational institutions. This responsive website offers dedicated portals for students and administrators, enabling quick submission, tracking, and resolution of campus issues such as hostel, academics, mess, Wi-Fi, and other facilities.

Students register with Name, unique PRN, Email, and Password. They log in using PRN and password to access a personalized dashboard showing their name, complaint statistics (Total, Pending, In Progress, Resolved), a category bar chart, and a table of their complaints (ID, Title, Category, Description, Status, Date, Files). A modern modal allows easy complaint submission with title, category, description, and file uploads, displaying a clear success banner.

Administrators log in with email and password to access a powerful dashboard featuring real-time statistics, interactive charts (Pie, Line), full student management and per-student complaint views with status updates.

Built using React (frontend), Node.js/Express with MongoDB (backend), JWT authentication, Multer for files, and Recharts for visualization, the website delivers a clean dark cyan-blue theme with responsive design, and smooth interactions.

This website eliminates paperwork, speeds up resolution, improves transparency, and enhances the campus experience through effective digital grievance management.
